FIGHT THE KOCH BROTHERS WITH YOUR WALLET - PRINT IT, LIVE IT, **KOCH BLOCK IT.**

## Chemicals, Coal & Oil:

Through its subsidiaries Koch operates refineries in Alaska, Minnesota and Texas, with a combined crude oil processing capacity of more than 800,000 barrels per day. Koch Industries owns or operates about 4,000 miles of pipelines that transport crude oil, refined petroleum products, natural gas liquids and chemicals. Koch Minerals and its affiliates are among the world's largest dry-bulk commodity handlers, marketing and trading more than 40 million tons of coal, coke, cement and other related products annually. Flint Hills Resources produces about 9 billion pounds of building-block chemicals per year. Koch is a leading producer of paving and roofing asphalt. [www.kochind.com](http://www.kochind.com)

### Koch Industries Produces:

- \* Gasoline
- \* Diesel
- \* Jet fuel
- \* Naphtha
- \* Asphalt
- \* Benzene
- \* Toluene
- \* Metaxylene
- \* Paraxylene
- \* Orthoxylene
- \* Cumene
- \* Cycohexane
- \* Heavy reformat
- \* Pseudocumene
- \* Sure Sol ® 100
- \* Sure Sol ® 150
- \* Purified Isophthalic Acid
- \* Maleic Anhydride
- \* Trimellitic Anhydride
- \* Ethylene
- \* Chemical Grade Propylene
- \* Polypropylene
- \* Polyethylene

“In Flint Hills Resources manufacturing plants, various hydrocarbon products are the basic feedstocks. At the refineries, the main feedstock is crude oil. The refineries produce a wide range of transportation fuels for motorists, truckers and the airline industry. In the olefins plants, the company processes natural gas liquids into ethylene and propylene. In the polymers plants, those two products are processed into various forms of polypropylene, which are key ingredients in products such as consumer and healthcare products, packaging and other plastic products. In the aromatics plant, products produced during the crude oil refining process become xylenes, cumenes and other light products. Those products are the building blocks for many other chemicals and plastics.”\* [www.fhrstage.fhr.com](http://www.fhrstage.fhr.com)

Koch Carbon, LLC and its affiliates globally trade and transport petroleum coke, coal, cement, pulp and paper, sulfur and other related commodities through a network of bulk import/export terminals in the United States and Europe. The C. Reiss Coal Company is a leading supplier of coal and related products typically used in industrial applications or to generate electricity.

Koch Exploration Company, LLC and its affiliates acquire, develop and trade petroleum and natural gas properties in the United States, Canada and Brazil.
